25X1Research, Development and Production Review Board  
Ideas and Requirements Panel

- I. Meeting #6 was held in the OC Conference Room at 1430 hours on 16 November 1955. The people who attended were:

25X1

- II. The following items were discussed:

1. The operations representative requested a run down as to the present status of the unconventional power sources. This was given by the Engineering representative.

2. [ ] indicated that a requirement had been expressed to him informally by FI personnel for a receiver of small size that could be utilized by agents for receiving low power transmission from [ ]. Such equipment would be utilized for giving information to the agent where it was inadvisable for him to make contact with [ ]. The FI representative indicated that they had a requirement for such a device.

3. The FI representative then presented some requirements for consideration by the panel. These requirements are as follows:

A. Ten of the [ ] transmitter adaptors.

B. An adaptor similar to the [ ] adaptor but utilizing voice transmission and providing a transmission range of from five to twenty miles. (Engineering was requested to investigate the feasibility of such an adaptor.)

C. Twenty sets of the RS-13 equipment. It was also indicated that they would be interested in a smaller size version of this equipment.

D. Any system that would provide a means of automatic communications wherein the agent would require practically no training in order to learn to operate the equipment.

4. Some discussion took place between the O&T representative and the FI representative regarding the use of the telephone dial keyer mechanism for transmissions from agents and dictation speed broadcasts for transmission to the agent. It was agreed that an operational test would be planned by O&T and FI utilizing Case Offices to operate the equipment.

5. The Chairman introduced the idea that he believed that there was some paging system available for operation at radio frequencies which might be useful for agent operations. It was agreed that Engineering would look into this matter.

25X1

6. The FI representative suggested that he would like to bring to the next meeting [ ] of the SR Division. This was agreed to by the members of the Board.

III. The meeting adjourned at 1615 hours.
